

FSE 570 Capstone Project Report Rubric

Criteria	Weight	Description	Evaluation Scale
Clarity and Organization of Report	10%	The report adheres to the 8-page limit, formatted in the ASME conference paper style. The report is clearly structured with a logical flow of ideas. The content is well-organized, and all sections are clearly defined.	1: Disorganized or exceeds 8 pages 3: Organized but lacks clarity in some areas 5: Clear, concise, well-organized within 8 pages
Writing Quality, Formatting, and Citations	10%	The report is well-written with no grammar or spelling errors. It is free from jargon and written in clear, professional language. The report follows ASME formatting guidelines. Proper citations are used throughout, and the plagiarism score is < 15% in Turnitin.	1: Significant writing, formatting, or citation issues 3: Few writing issues, minor formatting or citation inconsistencies 5: Well-written, properly formatted, clear, professional quality with correct citations
Data Sources and Data Analysis	20%	Use of at least two large, heterogeneous datasets. Clear explanation of data sources, structure, and relevance to the project. Adequate handling of data cleaning, preprocessing, and integration. If using proprietary or sensitive data, demonstrates that permission has been obtained and shows how the data is protected, anonymized, or masked.	1: Incomplete data or unclear analysis 3: Adequate data use, but lacks clarity 5: Clear, detailed, and well-explained data sources and analysis
Methodology and Application	25%	The methodology is well-explained and justified, demonstrating the application of advanced techniques such as machine learning, regression, Bayesian methods, or neural networks. The report includes detailed steps of the data science models and techniques, how they were tested, and validation methods such as cross-validation or test/train splits.	1: Incomplete or unclear methodology 3: Adequate methodology, but lacks sufficient detail or justification 5: Strong, well-justified methodology with clear application and validation
Results, Visualizations, and Recommendations	25%	The report includes relevant graphs, tables, and visualizations to represent the findings. Visualizations are clear, accurate, and appropriately labeled. The results are analyzed, interpreted, and tied back to the problem and methodology. Recommendations are provided that align with the technical decision-making nature of the problem, offering actionable, data-driven suggestions based on the analysis.	1: Poorly presented or unclear results 3: Adequate presentation of results with some visualizations and limited recommendations 5: Clear, well-organized results with effective use of visualizations and strong, actionable recommendations
Overall Impact and Quality of Report	10%	The final report presents a coherent, high-quality analysis that addresses the problem and offers feasible solutions or decision-making frameworks. The report is presented in a polished and professional manner, demonstrating deep understanding of the project.	1: Low impact, poorly executed analysis 3: Adequate quality but lacks polish or depth 5: High impact, polished, deep, and professional analysis

FSE 570 Capstone Project Presentation Rubric

Criteria	Weight	Description	Evaluation Scale
Clarity and Organization of Presentation	20%	The presentation is well-organized, with a clear introduction, body, and conclusion. The content is communicated in a logical and easy-to-follow manner. The presentation fits within the 10-minute presentation limit and allocates 5-minutes for questions.	1: Disorganized or exceeds time limits 3: Organized but lacks clarity or timing 5: Well-organized, clear, within 15 minutes
Engagement and Delivery	20%	The presenter engages the audience, maintains good eye contact, and speaks clearly. Effective use of voice, tone, and body language. Demonstrates confidence and professionalism.	1: Poor delivery, lacks engagement 3: Adequate delivery, but could be more engaging 5: Clear, confident, and engaging delivery
Content and Technical Depth	40%	The presentation summarizes the project's objectives, methodology, results, and significance clearly. Provides sufficient technical depth to convey the complexity of the project while remaining accessible to a broad audience. Includes key findings and conclusions.	1: Lacks clarity or technical depth 3: Adequate content with moderate technical depth 5: Clear, detailed, and technical with accessible explanations
Visual Aids and Graphs	20%	Effective use of visual aids (graphs, slides, diagrams) that enhance the understanding of the project. Visual aids are clear, professional, and well-labeled. Visuals are not overcrowded or overly complex.	1: Poor or unclear visuals 3: Adequate visuals but could be clearer or more relevant 5: Strong, clear, professional visuals enhancing understanding
